

Save 50% on Gatorade®

Save 50%... On average, bottled Gatorade sells for \$5 to \$6 per gallon, depending on promotions and the size of bottles purchased. When you purchase Gatorade in powder form and add your own water, your cost per gallon is \$2.75. A savings of 50%. (For example, 32 oz bottles of Gatorade typically sell in grocery and discount stores for between \$1.25 and \$1.50 per bottle, which equates to \$5 to \$6 per gallon. Actual savings can be even greater when 12 oz and 20 oz bottles are used for comparison.)

Support your favorite group... Your favorite fundraising group keeps **40-50%** of the sale price on all items purchased. A true win-win! How can this be? Simple: It costs money to bottle and ship water.

Help preserve the planet... When Gatorade is purchased in powder form there are fewer trucks distributing water in plastic containers. Which means less fuel consumed, less plastic produced and less carbon emitted.*

Mixing is as easy as 1-2-3!

- 1: Pour contents of Gatorade pouch into a 1-gallon container.
- 2: Add 1 gallon cold water.
- 3: Shake or stir until mix is completely dissolved.

Gatorade is a Smart Choice product.

Visit the Gatorade Sports Science Institute - www.gssiweb.org - for the latest in hydration and nutrition science.

* Due to their convenience, bottled drinks will always be a popular and practical choice in many instances. All Gatorade containers are made from recyclable materials and can be reused when making drinks from concentrate. 

Since 1965, Gatorade has been rehydrating and refueling athletes in ways water can't.
